				DATE MAILED: 01/24/200	4

Please find below and/or attached an Office communication concerning this application or proceeding.

- 1. Objections to the drawings are withdrawn in view of applicant's persuasive arguments and submission of replacement drawings filed 11/08/2005. The Examiner acknowledges applicant's claim for priority and its satisfactory requirement. Applicant's arguments have been fully considered but they are not persuasive. The Examiner further lists Chung et al U.S. Prior art PgPub reference to Chung et al on the enclosed PTOL-1449.
- 2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Haskal et al (USPN 5,952,778).

As to claims 1 and 21, Haskal et al disclose an organic electroluminescent display (Figs. 1, 2) including: a substrate (8, 26), an organic electroluminescent unit including: a first electrode unit (6, 22) formed on the substrate in a first predetermined pattern, an organic layer (2, 20) formed in a second predetermined pattern, and a second electrode unit (4, 24) on a top surface of the organic layer in a third predetermined

pattern to be insulated from the first electrode unit; a sealing unit (12, 14, 16 as shown in Figure 1), which is joined with the substrate to hermetically seal the organic electroluminescent unit; and an anti-projection unit (30) which would prevent an image of an interior structure of the organic electroluminescent display from being projected on the substrate.

- 4. As mentioned in the last office action, claims 2-4, 14, 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Additionally, claims 5-13, 15, 16, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Withdrawal of prior art rejection of claims 5-13, 15, 16, 19 and 20 is in view of applicant's persuasive arguments.
- 5. The Examiner replies to applicant's arguments (filed on 11/08/2005) as follows.

Applicant argues that Haskal reference (US Patent 5,952,778) does not anticipates applicant's claimed organic EL

device since metal layer 30 in Haskal's reference is not in fact the same as the structure of the anti-projection unit as recited in claims 1 and 21.

This is not found persuasive. The metal layer 30 in
Haskal's reference acts as anti-projection unit, as recited in
claims 1 and 21, since it prevents image of an interior
structure of the display from being projected on the substrate.
Although there are gaps between strips of the metal layer, the
metal layer 30 of Haskal's display acts as anti-projection unit.

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ashok Patel whose telephone number is 571-272-2456. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimesh Patel can be reached on 571-272-2457. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
